

DEGEN TRADERS

- Utility LABs -

DEGENBOT

it's got an V2 update with /chart option and liquidity data in /supply option.
Price of bot has changed and it's now 1bnb for full setup + 0.05bnb monthly hosting fee. Also, thru bot fee we've collected some amount of other projects tokens and we now hold Fook: 691, Burnit: 30600 and RBL: 1500, all together worth 7000\$.
Short term developments of bot that we're working on are: offering bot to wider crypto markets and including reseller fee, bringing comand to directly open SDwidget in bot for buy, and making a bot deployer bot to automate the whole process

DEGEN NFT

collection of 5000 Degens on ERC721 Polygon contract, trade listing on OpenSea and rarity listing done on RaritySniffer. We're currently working on Degen backstory and exploring bridge options to BSC chain in order to add some crazy blockchain utility to them

DEGEN D.U.M.P

contract is finished and in the past week is in harsh testing phase, we need to make sure it's absolutely bulletproof. We're building Admin Panel in Vue.js for interacting with it, still don't know the exact date of the launch, but it will be soon

DEGEN WEBSITE

currently in "under construction" mode, but it has all the necesery data and a widget. More then most full sites.
We're currently working on completely new website with web3 admin panel. All in an effort to interact with Degen contracts that are currently in development

DEGENERIC RECAP

DEGENS, TIME GOES FAST. IT'S ABOUT 2 MONTHS FROM OUR LAUNCH AND A LOT OF THINGS HAPPENED IN THE MEANTIME. HERE IS A LITTLE RECAP OF KEY THINGS THAT WE'VE DONE AND WHAT WE ARE WORKING ON

DEGEN ROYAL RUG

it's a set of services, mostly design and animation, which will be offered to new projects in order to kickstart their socials

DEGEN LISTINGS

we've done listings on SDtokens, Divvy dashboard, Sinu list and Nomics. CMC application has been made and we are now waiting for the review

DEGEN MARKETING

we are preparing for a big marketing push, collecting offers and exploring tactics. Plan is to start with marketing shortly, prior to DEGEN D.U.M.P launch and make an attack on all fronts: Telegram, Twitter, Youtube... also, to get a payed commercial thru CoinZilla

DEGEN SOCIALS

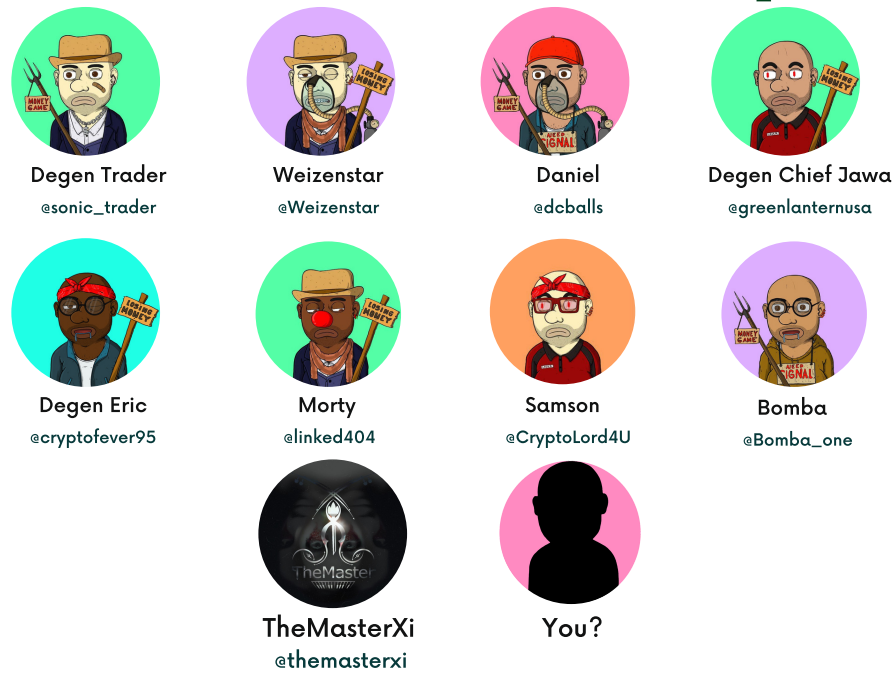

Degens are having fun on Telegram, Twitter, Discord, Facebook, Instagram and we've opened an account on Youtube and LinkedIn to start working on those platforms

- SuperDegens -

There are currently 9 SuperDegens in development team, working hard, having fun. We're constantly expanding, since we have so many ideas and goals. Doing things the right way takes time and effort and there's no way around it.

DEGEN FUTURE:

Degen P.U.M.P - contract
Degen R.U.G - contract
Degen H.P.O.T - contract
Degen & Poors - contract
Degen Rehab Clinic - real world project
Degen Museum - metaverse project
Degen Merch Store
Degen Bridge
Degen Swap
